

Skills Day students ask 'Whodunit?'

A dreadful murder took place at the school on Thursday 4th March! Luckily, Year 7 students on Skills Day put their forensic skills to the test to catch the murderer.

This Skills Day is based around the problem of trying to work out who murdered one of the teachers (Ms Cassell) and why. The murderer left a number of clues which the Year 7 students had to find and then test using forensic science. They also had to interview several suspects and from all the information gathered, work out whodunit. Of course, just like any good murder-mystery there

were several red-herrings which the students had to identify. They also had to decide which evidence was important and which was not. From all their evidence they then put together a case to go forward to the Crown Prosecution Service. As well as developing problem-solving skills the day helps students to work in teams and put their science skills into action.
